

One Bundle to Protect Your Enterprise

With the proliferation of IoT, mobile, and cloud, the attack surface has increased dramatically. Attackers are leveraging these new entrances within the extended enterprise to mole their way into the critical systems housing critical data and sensitive customer information.

The Fortinet FortiGuard Enterprise Service Bundle was designed to address the needs of the enterprise security landscape. It contains all of the major and emerging FortiGuard security service functions to help keep partners and customers one step ahead of the attackers.

- Recommend a single SKU, 69% less expensive than selecting the services a la carte, containing all of the necessary security service options to secure your customers' Enterprise networks.
- Increase your average deal size by 25-100% when quoting the FortiGuard Enterprise Service Bundle *
